

Page 1: Lane Offline Operations & DB Synchronization

Issue: Lane operating in Offline Mode (Red indicator on status bar).

Symptoms: Store register is unable to sync transactions with master server or load updated price book items.

Step-by-step Resolution:

1. Verify master server service 'LOC_DB_Sync' is running via Windows Services (services.msc).
2. Check network connectivity between Lane and Server (Port 1433 for SQL Server).
3. If server is reachable, force manual DB sync by running 'C:\LOC_SMS\Bin\SyncTool.exe /force'.
4. Inspect sync error log at C:\LOC_SMS\Logs\Sync_Error.log.
